- Water cycle

Expressive Arts and Design

Activities we may use to promote this:

- Role play
- Collages of leaves.
- Weather paintings
- Body percussions
- Musical instruments.
- Create a weather chart

This half term Class 2's topic will be:
"Weather and seasons"

This leaflet outlines aspects of the topic which we will be covering in class and has some suggestions of activities you can do at home. It can also be used as a reference for those moments when children say "we did nothing today". If your children say, build, create, or write anything at home please bring it in, we would love to see it.

If you have any skills that might help with topic please let me know!

Don't forget if you have any questions, don't hesitate to ask me.

Thank you all for your support last term and look forward to continue working with Class 2 and yourselves.

Miss Simpson

Personal, Social and Emotional Development

Activities we may use to promote this:

- Circle time to discuss different weather types and the effect it has on us and the environment.
- Sorting clothes to match the seasons.
