Dear Parents/Carers

This half term Mr Woolcock is going to be starting an exciting new club on Tuesday afternoons. App Design Club will run from 3.15 until 4.15 and will be a fun and creative opportunity to use technology to learn about and build our own apps. We'll be looking at what makes popular apps successful, what ideas might work really well and then designing templates for these apps. Alongside this we will begin to learn how to code in the Swift language on the iPads – the language that most iPhone and iPad apps are written in.

We will also be looking to link up with other clubs around the country (and maybe even around the world!) to share our finished app ideas and compete in some virtual 'Dragons Den' type showcase events. There is a separate permission box on the form below for this to allow your child to take part as this will involve talking to pupils in other schools (with close supervision of course).

This club is initially open to all Year 5 and Year 6 pupils who can express interest by returning the slip below to Mr Woolcock. We're limited by the amount of iPads we have access to, so in the event that more children apply then we have spaces for there will be a random draw of names. I will ensure children are told on Monday 4th November ahead of the club starting the following evening.

Please return the below permission slip for the club if you're interested by Monday 4th November.

I look forward to seeing lots of you there!

Mr Woolcock

NAME OF CHILD ………………………………………………………………………………… CLASS …………..

☐ I give permission for to attend App Design Club on Tuesday afternoons, if a place is available.

☐ I give permission for my child to take part in events linked to this, including the 'Dragons Den' showcase where we pitch our apps to pupils in other schools.

SIGNED ……………………………………………………………………………… Parent/Carer
